Spain

+15 years exp Front-end Developer

Lead, Speaker, Mentor.

BSc - Technical Engineering in Computer Systems

MSc - Computer Engineer

Seasoned Frontend Engineer with Expertise in Modern Web Technologies

With a robust foundation in JavaScript/Typescript, Node/Bun, React, APIs, I am deeply committed to the principles of clean and efficient software development, including TDD, KISS, and SOLID. My approach is meticulous and self-driven, shaped by a passion for continuous learning and improvement. I actively engage with cutting-edge web technologies, contributing to resources like [MDN](#) and staying abreast of the latest ECMAScript specifications and ts39 GitHub proposals of the standard.

I bring a thoughtful approach to user experience with emphasis on getting the details right, I balance technical proficiency with a creative flair that enhances user interactions. My colleagues recognize me for my attention to detail and commitment to delivering user-centric solutions.

WORK EXPERIENCE

Senior Fullstack Engineer – Contract - 2025 - Present

I develop high-performance REST services using TypeScript with Bun.js and PostgreSQL, integrating complex third-party APIs to extend product functionality. On the frontend, I build and optimize marketing and landing pages with Next.js, React, and TailwindCSS for styles and Prisma as ORM, ensuring excellent SEO, accessibility, and performance. My role also involves collaborating with design and marketing teams.

Senior Frontend/Fullstack Engineer – [Sphinx](#) – 2024 - 2025

I am currently leading the front-end implementation of the exchange application using React, Zustand and TanStack libraries, integrating cosmos blockchain and interacting with Keplr wallet through @cosmjs and @keplr-wallet. My role involves the use of gRPC, websockets and APIs with Golang to create the company stack, as well as extending blockchain functionalities using Cosmos SDK.

Senior Frontend Developer – Contractor – 2023 - 2024

Starting the development of various applications for third-party clients using advanced React frameworks like Next.js and Gatsby, integrating Web3.js for blockchain functionalities. My role involves the strategic use of NodeJS with Express for Rest APIs to create robust, scalable applications. As well as helping the QA team to improve and extend Playwright integration test cases and with Vitest unit test cases.

Mentor Frontend – 2022 – Present

I mentor junior and mid-level developers, fostering their growth in web development. My focus is on instilling best practices in design patterns, testing strategies, and algorithmics, alongside deep dives into JavaScript, NodeJS, APIs, websockets.

Head of Frontend Engineering – [Vosbor Exchange](#) - 2021 – 2023

As the Tech Lead, I spearheaded the planning and development of key web features using react-redux-saga, styled-components, and TanStack react-query. I implemented comprehensive test coverage using Cypress and Jest, managed roadmap planning with stakeholders, and designed micro-frontend architectures to integrate various application contexts, collaborating closely with the DevOps team.

Senior Frontend Developer – Contractor – 2020 – 2021

I developed and integrated advanced frameworks such as Pixi.js for WebGL rendering and GSAP for dynamic animations. I enhanced project quality by implementing robust testing strategies using Jest, and set up new projects utilizing Parcel, Babel, and TypeScript. My role also included building web services with Node.js+Express and integrating Kafka messaging systems.

Tech Lead Frontend – [The Workshop](#) – 2017 – 2020

I coordinated UI tasks and ensured code quality across the team, developing web applications with Angular 2, RxJS, Mobx.js, and ngrx/store in TypeScript. I extended our internal framework with reusable web components, defining and implementing testing protocols to maintain high standards.

Web Developer – [William Hill](#) – 2014 – 2017

My role encompassed backend development with NodeJS, creating REST APIs, and integrating cache servers and message queue systems for sportsbook applications. I also worked extensively with AngularJS, underscore.js, and async to enhance front-end functionalities.

Frontend Developer – [Video Stream Network](#) – 2012 – 2014

I was responsible for developing and refining a proprietary JavaScript framework, designing user interfaces, and creating custom jQuery UI widgets to enhance application interactivity and user experience.

Frontend Developer – Nemertes – 2010 – 2011

I engaged in full-stack web development, crafting responsive designs with HTML, CSS, JavaScript, and .NET, and managing data interactions using MySQL and the Google Maps API to deliver comprehensive user-centric solutions.

Education

- University of Hesperides – Specialist in Multimarket Investment and Diversification. 2026
- University of Alicante – **Computer Engineer** (Master). 2010
- University of Alicante – **Technical Engineering in Computer Systems** (Degree). 2007

Tech Skills

- Knowledge of the main JS frameworks such as React, Next.js, Angular, RxJS, ExpressJS, Cosmjs, Web3.js.
- Key Skills: EcmaScript, Node.js / Bun.js, HTML5, CSS3, WebComponents.
- Have experience with: React, Next.js, WebComponents, React-query, Styled Components, TradingView, Redux, Saga, Angular, Mobx, Typescript, MongoDB, Vite, Webpack, Sass, Less, REST APIs.
- Testing tools I use/used: Vitest, Testing Library, Playwright, Jest, Storybook, Cypress, Karma, Jasmine.
- Have worked with at some point: Vue.js, Svelte, Astro, Lit Elements, ArangoDB, Semantic-ui, Codeigniter (PHP), Wordpress, Prestashop, Google Maps APIv3 (Javascript), Android SDK, goHugo (golang), Kafka, RabbitMQ, Grunt, Gulp, SQL, Riak, Scala, nginx, jQuery UI, Kendo UI.
- Tools I use or like: VSCode, WebStorm, Git, Chrome Developer Tools, Mozilla DevTools, Postman, curl, docker, docker-compose.

Open Source

- Contributor to BlackScholesJS in testing and fixes.
- Developer: [babel-plugin-jsx-slot](#) is a BabelJS [plugin](#) to transpile *s/ot* tag into React or Solid.js.
- Contributor to [astexplorer.net](#) in fixes and resolving issues.
- Contributor to [@github/catalyst](#) fixing documentation.
- Translator for [micro-frontends.org](#) into Spanish at [micro-frontends-es.org](#).

Personal Skills

- Lead with radical candor and empathetic feedback.
- Facility to work in a multidisciplinary team.
- Interest in new technologies and design.
- Analytical ability, synthesis capacity, innovation and creativity.
- Mentor and advise younger developers from junior to mid and from mid to senior.

Certificates & Memberships

- o Tech Meetup organizer AlicanteFrontend. 2024-2026
- o Mentor in Adalab Mentoring program. 2021-2023
- o Complete Intro to React. Brian Holt. FrontendMasters.com. 2020
- o Speaker in JSDay Canarias. 2019
- o Webpack: The Core Concepts & Web fundamentals. [webpack-academy](#) August 2018
- o Functional Programming Principles in Scala. *Coursera.org* January 2017
- o Python Data Structures by University of Michigan. *Coursera.org* October 2016
- o React for Web Developers. [O'Reilly](#) Live online training with Jonathan Stark. March 2016
- o M101P: MongoDB for Developers. *Mongo University* January 2014
- o Golang Gibraltar Community member during 2014 and 2015

PERSONAL INTERESTS

I'm interested in philosophy, film criticism and audiovisual production. I like to be informed of news about science and arts.

As a person interested in technology I've experimented with a number of languages like Rust and Python for pet projects or fun.

Recently I have been learning about Perps and Options trading as well as taking University Specialist in Multimarket Investment and Diversification at the University of the Hesperides.
